

Massachusetts Disclosure Label: Electricity Facts

Product Name: Variable Commercial Contract
Q2 2025 to Q1 2026

Hampshire Power Corporation (“Gridwealth Electric”) Disclosure Label

Electric power suppliers and distribution companies are required to provide customers with a disclosure label. The label enables consumers to look at the energy sources, air emissions, and information about the supplier’s company in order to make a more informed choice of a power supplier.

Generation Price		Commercial Customers				
Average price per kWh at different levels of use. Prices do not include regulated charges for customer service and delivery.	Average Use per month		1,000 kWh	10,000 kWh	20,000 kWh	40,000 kWh
	Fitchburg Gas And Electric Zone (Unitil)		14.248¢	N/A	N/A	N/A
	Nantucket Electric Zone		N/A	N/A	N/A	N/A
	NGRID Zone		16.703¢	17.814¢	17.613¢	17.531¢
	NSTAR Electric Company Zone		16.000¢	16.066¢	17.097¢	N/A
	WMECO Zone		15.144¢	16.723¢	16.960¢	N/A
	Your average electricity price will vary according to when and how much electricity you use. See your most recent bill for your monthly use and the Terms of Service or your bill for actual prices. If you have any questions about the price of electricity per kWh, you may contact customer service via the details listed below.					
Customer Care	1-877-700-6165					
Contract	You will receive a <u>variable</u> electricity supply price for the specified number of months in accordance with the Term section of your Massachusetts Electric Supply Contract.					
Power Source	Power Source	System Power				
Demand for electricity from all Gridwealth Electric customers was met by the following sources. Gridwealth Electric purchases 100% of its power from the New England System Mix. 4/01/2025 – 3/31/2026	Biomass	1.37%				
	Coal	0.12%				
	Hydro	7.13%				
	Imported	6.77%				
	Natural Gas	39.66%				
	Nuclear	19.62%				
	Oil	5.53%				
	Solar	7.25%				
	Wind	6.25%				
	Municipal Trash	0.40%				
	Other	5.88%				
	Total	100.00%				
Air Emissions: Provided by the Mass. Department of Environmental Protection. 1/01/2023 to 12/31/2023.	Emission rates from these sources, relative to the regional average, are compared to emissions from a new unit as determined by the Mass Department of Environmental Protection.	Air emissions in pounds per megawatt hour.				
		Emission Rate Category	CO2	NOx	SO2	
		New England	536.43	0.309	0.122	
		New Units	895	0.06	0.01	
Labor Information: Regional averages provided by MA DPU.	22% of the electricity from System Power came from power sources with union contracts with their employees. Labor information is based on information provided by ISO New England, Inc. for the period 1/1/2024 to 12/31/2024. Information regarding labor disputes is not available.					
NOTES: 1) Electricity customers in New England are served by an integrated power grid, not particular generating units. The above information is on generating units assigned to this electricity product for the period noted above. 2) You may also call Gridwealth Electric at 1-877-700-6165, the Massachusetts Division of Energy Resources at 1-617-626-7300, or the Massachusetts Department of Public Utilities 1-617-305-3500.

Label Definitions

Generation Price: The Generation Price does not include charges for Distribution Service, other Department regulated services or other non-generation products or services. See your most recent bill for your monthly use and actual prices. Contact Gridwealth Electric for more information.

Power Sources: Gridwealth Electric procures its electricity supply, on behalf of its customers, from system power contracts, not from specific generating units. The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power throughout the region as needed to meet the requirements of all customers in New England.

System Power represents power purchased in the regional electricity market. The System Power distribution presented in the table is based on the most recently available information provided via the NEPOOL Generation Information System. When you choose a power supplier, that supplier is responsible for generating and/or purchasing power that is added to the power grid in an amount equivalent to your electricity use. Known Resources include resources that are owned by, or under contract to, the supplier. System Power represents power purchased in the regional electricity market. Biomass refers to power plants that are fueled by wood or other plant matter.

Emissions for each of the following pollutants are presented as a percent of the regional average emission rate. Arrows represent the emission rate from a hypothetical new generation facility.

Carbon Dioxide (CO₂) is released when fossil fuels (e.g., coal, oil, and natural gas) are burned. Carbon dioxide is a greenhouse gas and a major contributor to global warming.

Nitrogen Oxides (NO_x) forms when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone (or smog), and may cause respiratory illness in children with frequent high-level exposure. NO_x also contributes to oxygen deprivation of lakes and coastal waters which is destructive to fish and other animal life.

Sulfur Dioxide (SO₂) forms when fuels containing sulfur are burned, primarily coal and oil. Major health effects associated with SO₂ include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO₂ combines with water and oxygen in the atmosphere to form acid rain, which raises the acid level of lakes and streams, and accelerates the decay of buildings and monuments.

Labor Information The information on this label regarding whether generators or suppliers operate under collective bargaining agreements is provided to inform you about whether the energy was produced in plants where employee wages and working conditions are mutually determined by employees and management, and protected by union contracts. The information in this label regarding the use of replacement employees during a labor dispute is provided to inform you of whether or not a generator or supplier, during a strike by or lock-out of its employees, has replaced them with other workers.
